

Resume

Name : Shigeru Iitaka

Home address : 3-2-21, Shin-machi, Fuchu, Tokyo, JAPAN

Phone: +81-423-65-2800

Fax: +81-423-69-5310

Office address: Department of Mathematics,

Gakushuin University

1-5-1, Mejiro, Toshima, Tokyo, Japan,

Phone :+81-3-3986-0221

Professor : Gakushuin University

Date of Birth : May 29, 1942

Citizenship: JAPAN

Education:

1955-58 Midori Middle School in Chiba

1958-61 Chiba Senior High School

1961-1965 University of Tokyo, undergraduate

1965-1967 Graduate School of University of Tokyo

March 1967 Master's degree, University of Tokyo

July 1970 Doctor's degree in Science, University of Tokyo

Positions held

April 1966- Instructor, University of Tokyo,

April 1970 Assistant Professor, University of Tokyo,

April 1976 Associate Professor, University of Tokyo,

April 1985-present Professor, Gakushuin University

honors

Iyanaga Prize of the Mathematical Society of Japan 1980

The Japan Academy Prize 1990

Papers by Iitaka

- [1] Max Noether's theorem on a regular projective algebraic variety. ,J. Fac. Sci. Univ. Tokyo Sect. I 13 1966 129--137 (1966)
- [2] Deformations of compact complex surfaces. ,in Global Analysis, Princeton Univ. Press, 1969, 267--272.
- [3] Deformations of compact complex surfaces. II. ,J. Math. Soc. Japan 22 1970 247--261
- [4] On \mathbb{P}^1 -dimensions of algebraic varieties. ,J. Math. Soc. Japan 23 1971 356--373
- [5] On \mathbb{P}^1 -dimensions of algebraic varieties. ,Proc. Japan Acad. 46 1970 487--489
- [6] Deformations of compact complex surfaces. III. ,J. Math. Soc. Japan 23 1971 692--705
- [7] On algebraic varieties whose universal covering manifolds are complex affine 3-spaces. ,Bull. Amer. Math. Soc. 78 (1972), 737 - 740.
- [8] On some new birational invariants of algebraic varieties and their application to rationality of certain algebraic varieties of dimension 3. ,J. Math. Soc. Japan 24 (1972), 384 - 396.
- [9] Projective manifolds whose universal covering manifolds are \mathbb{C}^3 . ,1975. pp. 353 - 356.
- [10] On algebraic varieties whose universal covering manifolds are complex affine 3-spaces. I ,1973. pp. 147 - 167.
- [11] Exceptional sets of algebraic varieties of hyperbolic type., A Symposium on Complex Manifolds (Kyoto, 1974). ,Surikaisekikenkyusho Kokyuroku (1975), No. 240 234 - 240.
- [12] Logarithmic forms of algebraic varieties. ,J. Fac. Sci. Univ. Tokyo Sect. IA Math. 23 (1976), no. 3, 525 - 544.
- [13] Classification of algebraic varieties. ,Proc. Japan Acad. 53 (1977), no. 3, 103 - 105.
- [14] Cancellation theorem for algebraic varieties. ,J. Fac. Sci. Univ. Tokyo Sect. IA Math. 24 (1977), no. 1, 123 - 127.

- [15] Structure of logarithmic K3 surfaces. ,Proc. Japan Acad. Ser. A Math. Sci. 54 (1978), no. 2, 49 - 51.
- [16] Symmetric forms and Weierstrass cycles. ,Proc. Japan Acad. Ser. A Math. Sci. 54 (1978), no. 4, 101 - 103.
- [17] On the Diophantine equation $\phi(X, Y) = \phi(x, y)$. ,J. Reine Angew. Math. 298 (1978), 43 - 52.
- [18] Finiteness property of weakly proper birational maps. ,J. Fac. Sci. Univ. Tokyo Sect. IA Math. 24 (1977), no. 2, 491 - 501.
- [19] On logarithmic Kodaira dimension of algebraic varieties. ,1977. pp. 175 - 189.
- [20] Genus and classification of algebraic varieties. I. ,Sugaku 24 (1972), no. 1, 14 - 27.
- [21] On Kodaira dimension of graphs. ,Proc. Japan Acad. Ser. A Math. Sci. 54 (1978), no. 5, 128 - 132.
- [22] Geometry on complements of lines in P^2 . ,Tokyo J. Math. 1 (1978), no. 1, 1 - 19.
- [23] An index formula for linear systems and transformations of Weierstrass points. ,Sugaku 30 (1978), no. 3, 271.
- [24] A numerical criterion of quasi-abelian surfaces. ,Nagoya Math. J. 73 (1979), 99 - 115.
- [25] Algebra and geometry -- classification and enumeration of algebraic varieties. II. ,Sugaku 29 (1977), no. 4, 334 - 349 (1978).
- [26] Duality theorems for symmetric differential forms. ,Proc. Japan Acad. Ser. A Math. Sci. 55 (1979), no. 2, 53 - 58.
- [27] On the homogeneous Luroth theorem. ,Proc. Japan Acad. Ser. A Math. Sci. 55 (1979), no. 3, 88 - 91.
- [28] Weierstrass forms associated with linear systems. ,Adv. in Math. 33 (1979), no. 1, 14 - 30.
- [29] Minimal models in proper birational geometry. ,Tokyo J. Math. 2 (1979), no. 1, 29 - 45.
- [30] On logarithmic K3 surfaces. ,Osaka J. Math. 16 (1979), no. 3, 675 - 705.
- [31] Symmetric forms and Weierstrass semigroups. (Copenhagen, 1978), ,1979. pp. 157 - 170, Lecture Notes in Math., Springer, 732,
- [32] Plucker-type relations. ,Sugaku 31 (1979), no. 4, 366 - 368.
- [33] Some applications of logarithmic Kodaira dimension. (Kyoto Univ., Kyoto, 1977), ,1978. pp. 185 - 206,
- [34] The virtual singularity theorem and the logarithmic bigenus theorem. ,Tohoku

Math. J. (2) 32 (1980), no. 3, 337 - 351.
